To contribute to a better tomorrow by providing world class Environmental Solutions.

## ABOUT US

ECON Group is a focused innovative Group having core competencies in the areas of civil construction, waste management, architectural designing, and Import/Export solutions. We are one of the leading companies in the field of civil construction of Sewage Pumping Stations, Raw Effluent Pumping Stations, Common Effluent Treatment Plants, Schools, Restaurants, Offices, Pubs, Residences, Commercial Spaces, etc.

From a humble beginning in 1999, we have transformed ourselves into an INR 24 Crores group with the help of Hard-Working Team, Technology and Entrepreneurship.

We have 20 years of experience in wastewater management solutions and Architectural designing solutions which included complete turnkey projects involving planning, design, civil work, electrical work, mechanical work, Erection & Commissioning and Operation & Maintenance.

With two decades of strong customer base and environment focused approach we have always aimed to deliver world class quality and unmatched expertise in our projects, it may be Construction, Architectural & Designing and other Operational lines of Business.

# OUR LEADERSHIP

## Arun Kumar Gupta

### Founder, Partner & Group Chairman

The founder, Managing Partner & Group Chairman of the company is the foundation on which ECON group is standing. His ideals of integrity, honesty, professionalism, and entrepreneurship has inspired us to bring ECON Group to new heights with every passing day and give this company the future that he foresees. Under his leadership the company has overcome many challenges and risen from the ashes.

Decades ago, Mr. Gupta started his career in 1978 as a Junior Engineer in Municipal Corporation of Delhi (MCD). Three years later he joined Compact Piles Constructions Pvt. Ltd. where he remained in service for a decade and rose to the post of General Manager. He was handling the complete operations and field Management for the Upper North region of the company. Thereafter he started his own Trading Business of Bathroom Fittings and accessories on Pan India Level, but his construction experience was calling him back. Hence was born, ECON which excelled in the Operation & Maintenance of Wastewater Treatment.

He had always seen ECON growing beyond the norms of Operation & Management. He led the company into Construction & Designing of Wastewater treatment plants. Our first project was in 2003 for the Global Name in Pharma "RANBAXY" in Gurugram. There was no stopping for him or the company after this, as we took multiple projects of Construction and O&M for wastewater treatment.

The next step was to enter the Construction Business with Civil and Architectural design for which he was the guiding force for his partners and team. Hence the civil and construction business was started in 2007. He is committed to the company and makes sure that he is personally involved in every project. Under his leadership the company and the staff feel a secure and steady hand above them.

## Arpit Gupta

### Managing Partner

Mr. Arpit Gupta is the Managing Partner of ECON with over 10 years of experience in the field of Construction of Waste treatment plants, Architectural design & construction of residential & commercial properties and spaces like schools, restaurants, pubs, homes, offices etc. He also has vast experience in Operation & Maintenance of Waste Treatment plants and handling of labor and manpower.

With a degree in Civil Engineering he started his career in 2009 as Site Engineer with the esteemed Triveni Engineering and Industries Limited. A Year later he joined as Manager in ECON and handled the complete Operations & Maintenance segment of the Group. He was largely responsible in giving ECON its name as the leader in Operations and Maintenance and a company which takes care of its clients as well as its people.

As the company was entering architectural designing and civil construction business it was, he who led this diversification at the helm and completed some major turnkey projects for the company with the help of his alliance making skills and vendor management. Mr. Gupta brought to fore the organization's expertise for 'Design and Build' construction solutions and gave "ECON WINGS TO FLY".

## **Shruti Gupta**

### **Head Operations**

Mrs. Shruti Gupta is a Management Professional with a master's in finance from IMT, Ghaziabad. She has a vast experience of Sales Support, Revenue Assurance and Strategic Planning in Telecom Industry with names like Airtel, Accenture. She is currently taking care of the complete Operations for the group from Management to Admin.

She is a people's person and makes sure that the staff employed in any of the group's umbrella companies feel a part of the family.

## **Dinesh Kumar Gupta**

### **Head Finance & Accounts**

Mr. Dinesh Kumar Gupta is a qualified commerce Postgraduate and Finance & Accounting professional. Over the past 31 years Mr. Gupta has worked for leading companies in various capacities in the field of Finance & Accounts.

Mr. Gupta has been associated with ECON for more than a decade, but he actively joined the team in 2017 wherein he assumed the role of the Chief Financial Officer and took responsibility of the complete Finance & Accounts function of the Group. Mr. Gupta is a dedicated and committed Individual who treats his responsibilities with utmost care and makes sure that every penny of the group is accounted for.

## **Antriksh Kansal**

### **Head Architect-Interior Designer & Partner-ECON STUDIO**

With a degree in Architecture from NIT, Bhopal, Mr. Antriksh Kansal is the Head Architect-Interior Designer in ECON Group and takes care of the complete architectural and interior designing segment of the company. He started his career in the year 2014 with a reputed architectural firm and served as their senior architect.

Driven by a passion to succeed and possessing requisite talent he made his mark on the various architectural & interior designing projects. He associated with ECON in 2016 as Chief Architect. After taking care of complete turnkey projects for ECON group now he has risen to be a Partner in ECON STUDIO, An esteemed name under the Umbrella of ECON Group. He played a prominent role in establishing ECON Group as a name to search for by securing several landmark projects, notable among which are PETALS World School (Kaushambi), The Grand Paris Banquets (Site IV, Ghaziabad), The Pub of India (Dehradun) and many more.

**This company** majorly deals in Waste Treatment Solutions like Wastewater Treatment, Solid Waste Treatment, Municipal Waste Collection etc.

## OUR BUSINESSES

### 1 ECON Private Limited

ECON Private Limited, Our Flagship Company, which was earlier known as ECON, is the company which gave us the foundation on which the Group stands.

This company majorly deals in Waste Treatment Solutions like Wastewater Treatment, Solid Waste Treatment, Municipal Waste Collection etc.

#### Waste Treatment Solutions

**Waste treatment** refers to the activities required to ensure that waste has the least practicable impact on the environment.

Wastewater treatment is categorized under 2 categories:

**Industrial wastewater treatment** : This describes the processes used for treating wastewater that is produced by industries as an undesirable by-product. After treatment, the treated industrial wastewater (or effluent) may be reused or released to a sanitary sewer or to a surface water in the environment.

**Sewage treatment** : This is the process of removing contaminants from municipal wastewater, containing mainly household sewage plus some industrial wastewater. Physical, chemical, and biological processes are used to remove contaminants and produce treated wastewater (or treated effluent) that is safe enough for release into the environment. A by-product of sewage treatment is a semi-solid waste or slurry, called sewage sludge. The sludge has to undergo further treatment before being suitable for disposal or application to land. For most cities, the sewer system will also carry a proportion of industrial effluent to the sewage treatment plant which has usually received pre-treatment at the factories themselves to reduce the pollutant load.

## Municipal Solid Waste Collection

Municipal solid waste (MSW), commonly known as trash or garbage is a waste type consisting of everyday items that are discarded by the public.

The collection and segregation of MSW is a big step towards creating a clean environment and further processing of waste for energy generation purposes.

At ECON we provide customized solutions as per the requirement of client and location. Our main strategy while designing these solutions is to provide best and most economical solutions which suits the requirements of the client but at the same time is also the best solution for our environment. We take care of complete turn-key projects which include :

- Design, Fabrication & Supply
- Erection & Civil Construction
- Electrical & Mechanical Works
- Trial Run of equipment
- Tie-up with well-equipped certified laboratory for analysis of water/wastewater/civil material/etc.
- Operation & Maintenance
- Collection of Waste
- Additional requirements & Solutions

**At  
ECON**  
we provide  
customized  
solutions  
as per the  
requirement  
of client  
and  
location.

# 2 ECON India Global Services LLP

## Civil & Construction Solutions

The company's capabilities span the entire gamut of construction – civil, mechanical, electrical and instrumentation engineering. We believe in providing 1 Stop Solutions which are meant to give the client a sense of hassle-free experience.

Several of the country's prized landmarks – Schools, Residential Spaces, Restaurants, Pubs, Wastewater Treatment Plants and many more.

EIG straddles five related businesses :

- Buildings & Factories
- Houses & Residential Spaces
- Commercial Spaces
- Housing Societies
- Water & Effluent Treatment

**We  
believe**  
in providing  
one Stop  
Solutions.

### 3 ECON STUDIO

#### Architectural & Interior Design Solutions

**Architecture** : is both the process and the product of planning, designing, and constructing buildings or any other structures.

It involves the below processes:

**Pre-Design** : Formulation of brief, preliminary discussions, site surveys and feasibility study.

**Sketch Design** : Space planning, architectural design, engaging consultants, and preliminary estimates of costing.

**Developed Design** : Detailed planning, selection of materials, presentation drawings, 3D Modelling and color sample boards.

**Administration** : Coordinating with various consultants over specifications and building consent applications.

**Observation** : Site observations, scheduling, and cost planning.

**Interiors Design** : is the art and science of enhancing the interior of a building to achieve a healthier and more aesthetically pleasing environment for the people using the space. The architect or designer performs the following:

- Designing initial concepts
- Furniture and decorative item selections
- Decorative material selections
- Construction document production
- Budgeting
- Project coordination

At ECON, our focus is to design each project of ours with a different pencil and on a different slate, making each project and each design of ours unique and one of its kind. We try to give each requirement of the client special attention and make sure that everything we have promised is delivered in our final output.

**Our focus**  
is to design  
each project of  
ours with a  
different pencil  
and on a  
different slate.

# Leading Exporters

of  
linens/home  
furnishings  
and Agro  
Products of  
unparalleled  
quality to  
luxury hotels  
& resorts and  
global  
retailers.

## 4 ECON Retail & e-Commerce LLP

### Import/Export Solutions

One of the leading exporters of linens/home furnishings and Agro Products of unparalleled quality to luxury hotels & resorts and global retailers.

**Agro Products :** Agro Products embraces a broad all-inclusive category of products related to AGRICULTURE. It includes a comprehensive range of raw and finished goods under the classifications of plants, animals, and other life forms. The term 'agro' has stemmed from the Greek word 'agros' meaning field, which has led to its current usage meaning anything that falls under the 'agricultural' category.
